

### Specifications for ELISA kits:

1. Diagnostic ELISA kit should be capable of measuring the respective analytes in serum/plasma (as appropriate) of patients.
2. ELISA kit should be approved for in-vitro diagnostics (IVD) and have appropriate certifications (ISO/CE/US-FDA etc.).
3. The kit should have detachable strips, so that 8/12 wells can be detached and run in batches of 8/12.
4. The seller will need to supply the proof of utility of diagnostic kits in reputed diagnostic laboratories in India.
5. The seller need to provide documentation as desired by the user department to assess the rate reasonability.
6. The delivery of kits must be staggered, and seller will need to provide the kits within one month of the date of the order.
7. The prices for the kits will be frozen for 3 years. The user department reserves the right to increase/decrease the quantity required based on the departmental needs.
8. The seller will always need to provide the QC certificate, user manual and other software/material (if required specifically for the kits quoted) for interpretation of the tests.
9. The seller will need to provide per sample cost for the respective analytes assuming that one plate will be run in two batches.
10. Demo kits can be asked (if required) by the user department.
