Eyesi Surgical Simulator; Sole Source Letter

Dear Sir or Madam:

Haag-Streit GmbH (formerly VRmagic GmbH) is the manufacturer of the Eyesi Surgical Simulator for the training of ophthalmosurgical skills which is based on proprietary technology. No other company is developing or producing the Eyesi Surgical Simulator.

To the best of our knowledge, at present there is no comparable product available in the market that allows the training of ophthalmosurgical skills like the Eyesi Surgical Simulator does. This conclusion is the result of ongoing market surveys and marketing efforts over the past years.

The Eyesi Surgical Simulator COMPLETE (CAT + VRT) comes with the following features:

- complete high-end Virtual Reality Simulator for intraocular surgery training with a motorized table
- 2 eye surgery training interface heads: one for cataract, one for retina procedures
- 2 movable artificial eyes with incisions/ports in which instruments can be applied for eye surgery
- 2 sets of 3 instruments each: one set for cataract, one for retina procedures; each instrument can be assigned several virtual instruments in the virtual world
- mimic of a stereoscopic operating microscope head with OLED displays and adjustable oculars (pupil distance, diopter setting, angle)
- mimic of a BIOM that can be controlled by the foot pedal
- foot pedal to control the microscope
- foot pedal to control the operating machine
- touchscreen to control the simulation system
- touchscreen to control the parameters of the virtual vitrector and phaco machine
- facility to view the live image and an external output for additional monitor/beamer (monitor/beamer not included)
- software modules for different stages of cataract and retina surgeries
- software with different stages of courses like Introductory, Beginners and Intermediate & Advanced

- user based curriculum where every trainee has its own login credentials and progresses through a courseware
- built-in evaluation system of surgical performance during training
- video replay and time lapse to review the last task
- possibility to network with an online portal (VRmNet) where educators can manage and monitor the trainees

Any institution which is interested in acquiring the Eyesi Surgical Simulator would be required to proceed with a purchase through Haag-Streit Simulation or an authorized distributor.

Sincerely,

Manuela Sutter-Meler
