BILASPUR (H.P)

Ref. No. AIIMBL-G/33/2026-O/o PROCURE

Dated: 25.06.2026

Notice for Objection Calling

Subject: Procurement of High end slit lamp with 3D imaging system on Proprietary Basis.

A demand has been received from the Department of Ophthalmology, AIIMS Bilaspur (H.P.), for the procurement of High end slit lamp with 3D imaging system on proprietary basis .

The product is a proprietary item of **M/s Haag Streit** AGI Gartenstadstrasse 10, Postfach, 3098 Koeniz, Switzerland. The Proprietary Article Certificate (PAC) issued by the firm has been duly attached and uploaded on the website. These documents are being uploaded for open information to all concerned firms to submit objections, if any, regarding the proprietary nature of the product, with reference to **AIIMBL-G/33/2026-O/o PROCURE**.

Comments/representations, if any, may be sent to **storeofficer@aiimsbilaspur.edu.in** or to the **Procurement Office, AIIMS Bilaspur (H.P.) – 174037, on or before 10 .07.2026 up to 5:00 PM.**

In the absence of any response within the stipulated time, it will be presumed that no vendor has any objection to offer, and the case will be processed on merit.

Faculty In-charge (Procurement)
AIIMS Bilaspur (H.P.)

Encl: Related Documents Enclosed.

- 1) PAC Certificate
- 2) Authorization certificate

**PROPRIETARY CERTIFICATE
TO WHOM SO EVER IT MAY CONCERN
COUNTRY OF INDIA**

This is to certify that we **Haag Streit AG, Gartenstadtstrasse 10, Postfach, 3098 Koeniz, Switzerland** are the sole manufacturer of the **Slit Lamp with Imaging model BQ 900 with IM 910 and BioMedix Optotechnik & Devices Pvt Ltd, 258 Amarjyothi Layout, Domlur, Bangalore, Karnataka – 560071** is exclusive authorized sales and service representative in the country of India. The proprietary features are as mentioned below.

THE MICROSCOPE:

The convergent Stereo view of the BQ 900 offers a very large binocular field of view with high resolution and depth of focus. Eyepiece adjustable to all pupillary distances allow for a fatigue free and relaxed examination, even during long examinations.

STEREO VARIATOR:

The Slit Lamp also has been identified by its unique option called Stereo Variator (Optional) which reduces the 13° angle to 4.5°. Thus, an enlarged binocular field of view is possible even with myopia or through small pupils. This also aids the observation, without additional lenses, of the peripheral fundus and vitreous. It improves fundus viewing for imaging applications.

ILLUMINATION:

The well-established LED slit illumination unto 320,000 Lux brightness paired with precision mechanics and high-quality optics establish an excellent slit image with brightness from 14 mm length and width to a hairline. The possibility to rotate the slit 90° around the optical axis on either side, tilting it up to 20° and decentering it, lets you find the right adjustment for all examination situations.

INCLINED EYEPIECE ADAPTOR:

The Slit Lamp is designed with simple but effective device which allows the eyepieces to be inclined upwards by 20° from their traditional horizontal position, thereby reducing neck strain in allowing a more natural viewing position to the user.

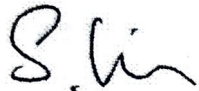

HAAG-STREIT AG

Gartenstadtstrasse 10, 3098 Koeniz, Switzerland
Phone: +41 31 978 01 11, Fax: +41 31 978 02 82, E-
mail: info@haag-streit.com

IMAGING MODULE:

The Imaging Module 910 provide you with outstanding image quality. A performant auto-exposure mode in combination with the automatic aperture control guarantees great illumination at all times. In addition, the image selection algorithm ensures that you get the sharpest and most expressive image possible. The Imaging Module 910 provide you with outstanding image quality with a 3D Enabled Camera.

No other company in the world other than Haag Streit AG, Switzerland, manufactures the BQ 900 Slit Lamp with Imaging Module 910 with the above-mentioned features.
